[085156358231](tel:085156358231) | [kakaanderesta4@gmail.com](mailto:kakaanderesta4@gmail.com) | Karawang Jawa Barat

I am a student majoring in Informatics at Horizon University of Indonesia. I have a deep interest in technology and software development. During my studies, I have developed skills in various programming languages and the latest technologies. I am eager to continue learning and contributing to innovative projects that have a positive impact. I also have some work experience as a production operator. With more than 5 years of experience working in a leading manufacturing company, I have developed in-depth knowledge of various production processes and skills in operating machinery. My expertise includes process optimization, technical troubleshooting, and implementation of best safety practices to ensure a safe and productive work environment.

## Education

---
