As an active 5th-semester student majoring in Informatics Engineering, I have a deep interest in data management, database creation, statistics, and data administration. I am always eager to learn and explore new developments in the field of technology. On campus, I am actively involved in various organizations that have helped me develop my leadership, time management, communication, and teamwork skills. My experiences include participating in a data visualization competition with a project titled '5G Network Deployment,' serving as a facilitator for new students, and carrying the ceremonial tray at the 2024 graduation ceremony. I consistently strive to give my best in every task I undertake.

EXPERIENCE

Linguo ID (Internship)

Key Opinion Leader Specialist

December 2024 – Present

- Working together with KOLs, influencers, and community members

Celerates Acceleration Program (Kampus Merdeka)

Data Science Basic (Studi Independen)
