SUMMARY

Hello, I'm Juan Laurentius, a cum laude graduate in psychology from Atma Jaya Catholic University. My academic journey has been a fascinating exploration into the world of cyberpsychology, where I apply theories such as gestalt theories to unravel the intricacies of human perceptions within the digital realm.

In the realm of skills, I navigate the complexities of statistical analysis through Python and SQL, ensuring a robust understanding of data. Additionally, my proficiency extends to design and prototyping using Adobe Photoshop, Adobe Illustrator, Mirro and Figma, transforming concepts into visual realities. In the realm of data visualization, I utilize tools like Tableau and Data Studio to effectively convey insights.

My professional journey includes serving as an assistant lecturer, contributing to quantitative lectures on four occasions over three enriching years. Currently, I contribute to the field of Human Capital as an Employee Benefit Staff since December 2022 and as an Intern at Relasi Diri since June 2024.

My organizational engagements have seen me as an integral part of Psyght, contributing to the Visual Design team for 1 period and shouldering responsibilities as Treasurer and Secretary on the next period. Additionally, I've contributed to Atma Jaya Esports as part of the Social Media Team and played a role in the Publication and Documentation team for the Atma Jaya Week event.
